11/18/2014 TAMPERING HPD INSPECTION No. 1721/14

The steam pipe from the radiator was pulled before the inspection jetting raw steam into the apartment destroying it. It also prevented the inspector from discovering the devise constructed behind the radiator used to pervade the apartment with rat-bird mite infestation and toxic fumes

Mexican contractors on the roof regularly broke through the living room window. Top right. They constructed a vent in the bedroom behind the radiator to pervade the apartment with infestation and toxic fumes. On 05/2013 contractors dumped pesticides from the roof into the bedroom air-conditioning vent while I was sleeping making me extremely sick. I reported this to the 20th Precinct NYPD on or about 11/19/2013 after the attacks became worse forcing me into hotels by 11/16/2013
